

Workshop: NIH Funding to Support Research on Addictive Behaviors across Diverse Populations

Learn skills for writing a successful NIH grant application researching addictive behaviors across diverse populations. Workshop includes an introduction to the NIH grant process and application timelines. This workshop will discuss considerations for developing a stand out application and identify common pitfalls of applications in general and as well as those focused on diverse populations.

Some highlights of this session will include:

- ◆ Understanding the NIH grant writing process
- ◆ Identifying pitfalls in NIH grant applications focused on diverse populations
- ◆ Successfully navigating the NIH grants system
- ◆ Identifying funding opportunities focused on diverse populations

Dr. Kathy Etz received her Ph.D in Human Development from the University of North Carolina, Greensboro. She is the Director of the Native American Program at NIDA, where she also serves as a Program Director in the Epidemiology Research Branch. Dr. Etz's program area includes studies of population and clinical epidemiology in adolescence and early adulthood; psychological, familial and environmental risk and protective factors and processes and how these interact in the development of drug abuse; and the sequencing and temporal potency of risk factors that affect the development of substance abuse.

Dr. Judith Arroyo obtained her Ph.D from University of California at Los Angeles. She coordinates the Minority Health and Health Disparities activities at NIAAA. Her role includes identifying young investigators interested in alcohol research and helps to foster their research training and development. She provides enhanced technical assistance and advocate for minority focused research funding from her position in the Office of the Director of NIAAA.
