

CALL FOR PROPOSALS

Reaching New Frontiers in Addiction Science: Bridging the Gap to Treatment

We are excited to invite your proposals for symposium, paper, and poster presentations at the **11th Annual Collaborative Perspectives on Addiction Conference (CPA2023)**! This year, our theme is **reaching new frontiers in addiction science: bridging the gap to treatment**. Our goal is to address the gap between a world filled with massive amounts of data and new ways of collecting data (wearable devices, passive data, mobile cognitive tasks) and treatment approaches.

CPA has always represented a tremendous opportunity to present exciting research, network with scholars with shared interests, and learn about the latest addiction psychology research. The CPA community has steadily grown over the past decade, and we invite you to celebrate 11 years of addiction science research with us. CPA2023 will be held in **Albuquerque, New Mexico**, during **March 23rd – 25th, 2023** at **Hotel Albuquerque**.

Consistent with past conferences, CPA2023 will offer opportunities to give and attend symposium and poster presentations, and participate in network programming for professionals, postdoctoral scholars, graduate and post-baccalaureate trainees, and undergraduate students. We also continue the Program Chairs' Choice Paper Sessions, in which papers related to the CPA2023 theme will be selected and organized for presentation and lively discussion. We welcome addiction psychology research symposium and poster proposals submitted by scholars of diverse identities, particularly topics related to cultural diversity issues and work performed by individuals from underrepresented minority backgrounds. Presenters should be able to attend the conference in person.

PROPOSAL SUBMISSION PROCESS

All proposals must be submitted via a standard form on the [SoAP Web portal](#) by the deadline (**November 1, 2022**). Each individual may submit multiple proposals; however, you may present only one symposium session, one Program Chairs' Choice paper, and one poster presentation as the first/sole author. In the event that multiple proposals within each category are received from the same first author, only the first submission will be reviewed. Individual paper and symposium proposals will be given the option to be considered for a poster presentation should the paper or symposium proposals be declined. You may select one of the following presentation formats:

- **Symposium:** Submission includes a 250-word abstract summarizing objectives of all talks in the symposium. Submission also should include a 225-word abstract for each individual 15-minute

presentation. The individual abstract should summarize the significance of the research questions, study design and sample characteristics, analytic strategies, key findings, and conclusion.

- **Continuing Education (CE)** credits are a large part of CPA. This year we hope to streamline the process and are asking symposium chairs to **submit their CE credit application with their abstracts.**
- **Program Chairs' Choice Paper:** Submission includes a 225-word abstract summarizing empirical research, or methodological or theoretical advances related to one of the following topics:
 - Computational and data science approaches in addiction research
 - Novel and underused data collection approaches and methods in addiction treatment
 - Utilization of technology (e.g., wearables, app based, treatment devices) in addiction treatment services
 - CE credits will be available for program choice symposium, however this will occur after selection of papers and organization of symposia.
- **Poster:** Submission includes a 225-word abstract summarizing the significance of the research questions, study design and sample characteristics, analytic strategies, key findings, and conclusion.

REVIEW PROCESS

Each proposal will be reviewed by at least 2 doctoral-level reviewers, based on the following four scoring criteria:

- **Overall Quality/Importance:** Justify that the study addresses significant research questions
- **Innovation/Originality:** Indicate that the study yields novel knowledge in addiction psychology
- **Approach/Methodology:** Summarize rigorous and sound research methods
- **Diversity Considerations:** Discuss relevance to underrepresented minority groups, issues related to generalizability, and/or implications for research with diverse populations

Fit with CPA2023 theme is NOT a criterion for the peer-review process for regular symposium or poster proposals. Decisions will be announced by early January 2023.

SELECTED OPPORTUNITIES FOR REGISTRATION WAIVERS AND TRAVEL AWARDS

To support early-career investigators and trainees, we are pleased to offer a limited number of registration waivers and travel awards to offset the cost of presenting at and attending CPA2023. Specific award amounts will be determined at a later date based on available funding.

There are no separate applications for these awards. You must indicate your career status, and voluntary self-identified underrepresented minority status and financial needs. Awards will be selected based on masked peer-reviews of the proposal submissions. Final decisions will be made by the Program Co-Chairs.

DEADLINE FOR ALL PROPOSALS:

November 1st 11:59pm PST

Submit proposals at: <http://addictionpsychology.org/cpa>

Direct questions or concerns to the Program Co-Chairs:

Erin Deneke (EDeneke@caron.org) and Jordan Davis (jordanpd@usc.edu)
