

Postdoctoral Fellow Position

The Cofrin Logan Center for Addiction Research and Treatment at the University of Kansas is seeking a Postdoctoral Fellow to execute grant-funded research on alcohol use and related clinical health behaviors among young adults. The position will involve project management and opportunities for manuscript and grant-writing activities.

About us:

The Health Behavior and Technology Lab, under the direction of Dr. Tera Fazzino, studies reinforcement processes that contribute to behaviors associated addiction, obesity, and eating disorders. The lab uses mobile technology-based methods to measure health risk behaviors in real time, including alcohol use and reward-driven eating. Research in the lab is also focused on identifying prevention interventions that can address multiple health risk behaviors.

The Cofrin Logan Center for Addiction Research and Treatment is a research and treatment center that was established in 2018 at the University of Kansas (KU). The Center hosts researchers with expertise in a variety of areas of addiction and brings together scientists, practitioners, and students across diverse disciplines from KU, the KU Medical Center, and community partners.

Responsibilities will include:

Overall project management: Assist in research protocol development; coordinate IRB submission and human subject payments; assist in preparation of reports and manuscripts; develop and track budgets; supervise staff and students, to include scheduling, assignments, time reporting, and timely completion of duties; work with administration to maintain compliance with federal, state, and university regulations and policies. Data management tasks: Track project milestones; perform regular data quality assurance checks in Redcap, the online data collection platform; manage and report metrics of research success, produce descriptive and inferential reports of outcome measures.

Data analysis, manuscript writing, grant writing: Participate in the development of manuscripts to be submitted for publication. Assist with the development of grant applications for federal and private agencies. Conduct data processing and analysis tasks for manuscript and grant-writing activities.

Qualifications:

Required: PhD in social sciences, public health/epidemiology.

Preferred: PhD in behavioral sciences or related field; experience with addiction research; experience with project coordination, data management, and data analytic techniques; Experience with: clinical in research, research with young adult populations, NIH-funded projects, and IRB submission.
