

Call For Papers:
Social Media and Healthcare Technology
at the **Hawaii International**
Conference on System Sciences
HICSS-57: January 3-6, 2024
Hilton Hawaii Village Waikiki Beach Resort

What is it?

HICSS is the longest standing scientific conference in the information systems and technology field. Since 1968, it has attracted high caliber scholars and professionals in academia, industry, and government agencies around the world. Approximately half of attendees are from outside the US.

Why submit work to HICSS?

With the growing importance of technology in the delivery of healthcare, “Information Technology and Healthcare” is quickly becoming one of the largest areas of interest among HICSS attendees. It’s important to have the voices of medicine, behavioral medicine and the social sciences represented along side technologists.

Social Media and Healthcare Technology

HICSS presentations cover 10 broad topic areas (“tracks”) each with multiple specific interest mini-tracks. The “Social Media and Healthcare Technology” mini-track is seeking paper submissions for presentation at the 2024 conference. Each paper session will consist of 3-4 paper presentations (~20-25 minutes each) leaving time for positive, collegial discussion.

How do I submit my research?

Conference submissions are not abstracts - they are fully developed papers that are peer reviewed. Authors of accepted papers have the opportunity to respond to reviews and edit their papers before publication in the conference journal. The conference is highly competitive with < 50% of submitted papers being accepted.

Paper submission details:

Contact the mini-track chair [Beth Bock@Brown.edu](mailto:Beth_Bock@Brown.edu) for information about how to submit papers or check the HICSS website at <http://www.hicss.org/>

The manuscript submission deadline June 15, 2023.
