Postdoctoral Fellowship Opening in Addiction and Implementation Science in Psychology at University of Maryland, College Park

We are looking to recruit a postdoc with interest in addiction treatment and implementation science in underserved, marginalized communities, preferably with experience with both qualitative and quantitative methodologies, including longitudinal data analysis. There will be numerous opportunities for publications in the areas of substance use, implementation science, and peer delivery, including from two hybrid effectiveness-implementation trials of peer-delivered behavioral activation interventions in underserved communities in Baltimore and Detroit. Primary responsibilities may include, but are not limited to: data analysis and manuscript preparation, grant preparation, research staff supervision and mentorship, and clinical supervision (if applicable). Supervised clinical hours for licensure will be available focused on treating underserved, minority individuals with substance use, mental health, and co-occurring health conditions, including opportunities for integrated primary care. The position will be based at University of Maryland, College Park, the flagship campus of University of Maryland, located 5 miles outside of Washington DC, and 30 miles from Baltimore.

The postdoctoral associate should have completed the requirements for his or her PhD in psychology, public health, or a related behavioral sciences field. A successful candidate would have a strong publication history and record of securing external funding, excellent social, organizational, writing and data analysis skills, ability to work independently and collaboratively with internal and external partners. Candidates with advanced quantitative data analytic skills, and/or both qualitative and quantitative experience are preferred. Opportunities for independent data analysis, manuscript preparation, and grant writing will be available and encouraged. This fellowship has the potential to lead to a faculty position depending on the candidate’s ability to develop his or her own clinical research portfolio, teaching and supervision interests, and interest in collaborating on existing funded projects.

Applicants should email Dr. Jessica Magidson (jmagidso@umd.edu; subject heading: Addiction and IS Post-Doc Application) the following: 1) a copy of their CV; 2) cover letter describing fit with the position and relevant experience, research/career goals, and available start date; 3) writing sample, preferably a first author manuscript; and 4) names/contact information of three professional references. Start date is flexible anytime from July through Sept 2022. Applications will be reviewed as they are received through until the position is filled, with a preferred submission by December 1st, 2021. Email inquiries are welcome.

The University of Maryland, College Park, an equal opportunity/affirmative action employer, complies with all applicable federal and state laws and regulations regarding nondiscrimination and affirmative action; all qualified applicants will receive consideration for employment. UMD is committed to a policy of equal opportunity for all persons and does not discriminate on the basis of race, color, sex, pregnancy, gender identity or expression, sexual orientation, marital status, age, national origin, political affiliation, physical or mental disability, religion, protected veteran status, genetic information, personal appearance, or any other legally protected status in all aspects of employment.
