

# Postdoctoral Training in Behavioral Oncology

## POSITION HIGHLIGHTS

This NCI-supported T32 interdisciplinary training program is designed to prepare fellows for careers as independent investigators engaged in research on behavioral aspects of cancer prevention, detection and control. The program combines a specialized curriculum (formal didactic training and one-on-one interactions with experienced mentors) with research experience (participation in funded studies under the guidance of an experienced investigator).

We are particularly interested in candidates with an interest in cancer prevention and early detection, sociocultural issues in cancer prevention and control, disparities in cancer care and outcomes, quality of life and symptom management in cancer survivors, energy balance, psychosocial and behavioral aspects of cancer genomics and genetics, nicotine dependence and tobacco control, and health system and provider aspects of cancer prevention and control.

## REQUIREMENTS

Applicants from diverse disciplines with a terminal degree (Ph.D., Ed.D., Sc.D., Dr.P.H., or M.D.) in a social science, a behavioral science, nursing, education, public health, medicine or closely related field are welcome to apply. Prior experience with behavioral oncology research is not required. Applicants must be committed to a future career in cancer prevention, early detection, quality of life, survivorship or other aspect of behavioral research in cancer. Stipends and benefits are highly competitive. Review of applications will begin immediately and continue until positions are filled. Applicants must be U.S. citizens or legal permanent residents. Fellowships are for 2 years. Support for tuition, books, software and conference travel is available.

*If you have the vision, passion and dedication to contribute to our mission, then we have a place for you.*

**Program Co-Directors: Susan T. Vadaparampil, PhD, MPH & Vani N. Simmons, PhD**

## MENTORING

A strong mentoring and career development program is in place in the Division of Population Science. Training faculty include: Doratha (Armen) Byrd, PhD, MPH, Margaret Byrne, PhD, Tiffany Carson, PhD, MPH, Shannon Christy, PhD, Issam El Naqa, PhD, Anna Giuliano, PhD, Brian Gonzalez, PhD, Clement Gwede, PhD, MPH, RN, Heather Jim, PhD, Peter Kanetsky, PhD, MPH, Dinorah Martinez Tyson, PhD, MPH, MA, Cathy Meade, PhD, RN, FAAN, Usha Menon, PhD, Dana Rollison, PhD, Matthew Schabath, PhD, Vani Simmons, PhD, Marilyn Stern, PhD, Kea Turner, PhD, MPH, MA, Susan Vadaparampil, PhD, MPH, Damon Vidrine, PhD, MS, Jennifer Vidrine, PhD, MS, Christine Vinci, PhD

## BENEFITS

- Diverse faculty and transdisciplinary environment
- Trainees linked with a mentoring team
- Support for further training and professional development
- Competitive salary and benefits
- \$3000 NIH annual childcare benefit
